

1. Write JavaScript programs to solve the following problems. Display the results using `console.log()` or on a simple HTML page.
 - a) Find the Area of a Circle
 - b) Find the Area of a Rectangle
 - c) Convert Celsius to Fahrenheit
 - d) Calculate Simple Interest
 - e) Calculate the Perimeter of a Square
 - f) Calculate the Sine, Cosine, Tangent of any value
2. Create a simple HTML page where the user can input two numbers and choose an operation (add, subtract, multiply, divide) using buttons, then display the result.
3. Write a simple JavaScript program that uses **Sine formula** and **Cosine formula** to solve basic triangle problems.
